Mohamed Malek Amdrous

Lead UI Designer | Product Designer | Design Researcher | PhD Applicant

Casablanca, Morocco | +212 632 836 374 | melekamdrous@gmail.com
Portfolio: melekamdrous.github.io | LinkedIn: linkedin.com/in/mohamed-melek-amdrous

PROFESSIONAL SUMMARY

Lead UI Designer and design researcher with over five years of experience across UI design, UX strategy, design systems and product design, holding a Master's in Digital Design and a Bachelor's in Product Design. Currently at Aunica Inc, leading UI systems across web, mobile and software platforms, producing motion videos for SaaS products and applying AI throughout the design engineering workflow. Brings a hands-on, design-engineering approach: field research, sketching, 3D modelling and Figma prototyping, delivered as documented design systems that development teams can build from. Applying for PhD positions in Design and Human-Computer Interaction, with a research focus on human-centred AI and a long-term commitment to research and teaching.

PROFESSIONAL EXPERIENCE

Lead UI Designer

Aunica Inc | United States | Nov 2025 – Present

- Lead the design of UI systems across web, mobile and software platforms, establishing design standards, component libraries and a visual language that keep all digital products consistent and scalable.
- Apply AI across the design engineering workflow, from ideation and generative imagery to prototyping and production, to explore more directions and deliver faster without lowering quality.
- Produce motion design videos for SaaS products.
- Conduct user research, including user flows, persona development and usability evaluations, and integrate findings directly into the product design process.
- Collaborate with product and development teams to translate complex requirements into intuitive, accessible interfaces.

UI/UX Designer

MSavoir | Casablanca, Morocco | Jan 2024 – Nov 2025

- Designed and implemented a comprehensive design system in Figma, reducing design production time by 30% through standardised components, typography and colour.
- Created high-fidelity interactive prototypes and user interfaces that turned complex requirements into clear, usable designs, improving user engagement by 25%.
- Facilitated design reviews and cross-functional workshops, building shared understanding between design, product and engineering teams.

Product Designer & Visual Artist

DEBO | Tunisia | Jan 2018 – Aug 2023

- Designed and produced handcrafted products through sketching, 3D modelling and sculpting, building a material understanding of how objects are experienced and used.
- Led collaborative mural projects for arts festivals, coordinating multidisciplinary teams of artists and producing visualisations in Adobe Photoshop, Illustrator and Procreate.
- Designed and fabricated set elements and character accessories for a television production, including realistic marble texture painting.

Industrial Design Intern

Nottoy Boats | Tunisia | Feb 2022 – Apr 2022

- Contributed to the design and fabrication of boat components through sketching, 3D modelling and hands-on production support, including laser cutting and resin injection.

EDUCATION

Professional Master's Degree, Digital Design

Higher School of Design Sciences and Technologies | Tunis, Tunisia | Sep 2022 – Jan 2024

Specialisations: User Research, Persona Creation, Interaction Design, UI Design, UX Strategy, Project Management.

Bachelor's Degree, Product Design

Higher School of Design Sciences and Technologies | Tunis, Tunisia | Sep 2019 – Jan 2022

RESEARCH INTERESTS

Target fields: Design Research (practice-based research, research through design); Human-Computer Interaction (HCI); Human-Centred AI and Human-AI Interaction.

- **Human-AI collaboration in creative work:** how designers co-create with generative AI, what it changes for creativity and ownership, and what good co-creative tools look like.
- **AI in physical products:** smart objects and assistive devices that learn and adapt, building on a Product Design background.
- **Trust and explainability:** making AI decisions understandable to non-expert users, and understanding when people over-trust or under-trust AI.
- **AI for accessibility and inclusion:** designing AI with and for people with disabilities and underrepresented communities and languages.

Research methods: Field research, interviews, persona development, usability testing, participatory design, benchmarking and UX audits.

SKILLS

Design: UI Design, UX Design, Product Design, Design Systems, Component Libraries, Interaction Design, Wireframing, Prototyping, Information Architecture, Accessibility Design, UX Writing, Motion Design, 3D Modelling, Sketching

Research: User Research, Usability Testing, Persona Development, Field Research, Participatory Design, Benchmarking, UX Audits

AI: Generative AI for Design, AI-Assisted Prototyping, AI in Design Engineering Workflows

Tools: Figma, Adobe XD, Protopie, Webflow, Adobe Illustrator, Adobe Photoshop, Procreate, Spline, Blender, ZBrush

Front-End: HTML and CSS (basics), Webflow

CERTIFICATIONS

Webflow 101 Certification

Webflow | Dec 2023

No-code web development: custom domains, 3D integration, interactions and responsive design.

Professional Design Workshops

UX, interaction design and design thinking methodologies.

LANGUAGES

Arabic (Native) | French (Fluent) | English (Professional)
